MEDICAL STUDENT'S VOCATIONAL TRAINING JOURNAL

student's name and surname

	index number
	academic year
	3rd year of study
our	r the third year of studies, students are required to complete a 4-week vocational training (120 s) at the Clinic or Ward of Internal Medicine. student is bound by a 6-hour working day.
•	The purpose of the vocational training is to familiarize the student with the full range of activities related to work at the Ward of Internal Medicine.
2.	The function of the vocational training supervisor responsible for the implementation of the program is performed by a physician authorized by the manager.
3.	Organizer of vocational training / Person authorized by vocational training organizer credits the internship by placing an appropriate entry in the student's vocational training card . The condition for passing the vocational training is the achievement of the assumed learning outcomes by the student.
•••	
•••	
. • •	name and address of the vocational training place / stamp of the Institution

The student is familiar with the organization of the Internal Ward (Clinic) and the organizational links of the Ward (Clinic) with outpatient healthcare. Improves physical examination skills. Knows the principles of first aid (resuscitation). Develops the skills of recognizing and differentiating among basic disease entities, with particular emphasis on emergencies. Knows how to properly interpret the results of laboratory, imaging and pathomorphological tests. Participates in medical visits. Performs procedures common in everyday medical vocational training (intravenous injections, drip connection, catheterization, etc.) Assists at collecting material for diagnostic tests. During the four-week internship, the student is obliged to perform two duties between 15.00 and 21.00, during which they accompany the physician on duty in all medical activities (sees patients in the emergency ward, performs life-saving procedures, attends afternoon doctor visits).
