1st
year of study

Students are obliged to undergo vocational training for 4 weeks (120 hours) in the scope of patient care which could only take place in hospital wards and should include a 6-hour working day. Each student should be on duty twice during the training in the afternoon and evening hours. In order to pass the training, the student must demonstrate the familiarity with the general principles of organizing the work of the hospital ward and practical skills in the field of patient care, including subcutaneous and intramuscular injections.

1. **The purpose of the training** is to familiarize the student with the full range of activities related to patient care and general rules and regulations as well as administrative tasks characteristic of hospital wards.
2. The function of the training supervisor responsible for the implementation of the program is performed by a physician authorized by the manager.
3. Organizer of professional training / Person authorized by training organizer credits the training by placing an appropriate entry in the student's professional training card. The condition for passing the training is the achievement of the assumed learning outcomes by the student.
